The young enlightened Master Paramahansa Nithyananda's meteoric rise by untiringly helping humanity to raise in consciousness, invited tilt and jealousy of few vested interests in the Indian media. He became a target of a vicious religious persecution. He became the target of a mania frenzy which followed in the wake of the circulation of a defamatory fake scandal video.

The 2010 alleged scandal video showing [Paramahansa Nithyananda](#) was sent to four U.S.-based forensic analysis experts. All four experts have decades of experience--working with all levels of government and law enforcement and testifying at trial on a number of cases requiring forensic analysis expertise. They have given a professional analysis on the most "scandalous" video excerpt available online and on YouTube. Two of the reports further analyzed the forensic reports commissioned by the Karnataka CID:

KEY FINDINGS on Key Video Footage:

- "I have never seen such a grossly edited and altered series of defamatory videos in my time as a practicing audio and video forensic expert. Ed Primeau
- "There is no audio on the video. It would have been very easy to record audio. I believe audio was not recorded so the actors in the video could not be identified. The audio would help authenticate this video clip using forensic voice identification to aid in identification of the person in the video. Ed Primeau
- "There is an unusual flickering to the left of the television of items on a nightstand that cannot be identified. This indicates video compositing or layering. If the flickering were a result of the light source, the television would be flickering." Ed Primeau

- "As a video forensic expert, I recommend that this video be excluded from any factual relevance". Ed Primeau
- "There are questions as to whether the video could have been faked. The simple answer is. Yes, quite simply. With today's roto-scoping stunt persons in the motion picture industry commonplace, the technology is available for anyone with a little knowledge and a mid range computer to be able to render scenes like these." Bryan Neumeister
- "In this situation, video was allegedly taken December 23-25, 2009 and it emerged to the public March 2, 2010. What happened to the v during that time? We donE 1/4t know. The chain in this case was broken -- not only a little but extremely -- because we donE 1/4t have a trustworthy guardian of the video for over two months. During that time all kinds of digital manipulation may have been applied." David N
- "Because the chain of evidence was broken, and in addition because it was broken for such a long time, it almost doesnE 1/4t matter ho analysis you do. ItE 1/4s just not video we can trust." David Notowitz
- "The YouTube video clips reviewed are very misleading, if not outright fraudulent, from an evidentiary standpoint: There are edits, insert music, singing and/or commentary, which are more than mere misrepresentations of the putative original video content." Herbert Joe
- "If it is true that the woman is allegedly performing oral sex on the male, it is psychologically not possible for the male to be completely ur but in the video there is no change even in his breathing, facial expressions or body movements." Herbert Joe
- "It is of the expert opinion of the undersigned that such Report may not be admissible in any U.S. court of law, or may not survive a Dauk reliability challenge." Herbert Joe
- "Based on the information provided in Reports 1 and 2, it is of the expert opinion of the undersigned that there is no forensically tenable authenticate the silent video at issue, i.e., there is no forensically tenable basis to make a scientifically valid determination that the video is a true and accurate reproduction of the original recording." Herbert Joe
- "Furthermore, Report 1 does not explain the content, much less their forensic significance, of the clips or shots? Nor the content of retrie files? Nor the relationship of the clips to deleted files? Nor the significance of video clips and deleted files? Etc." Herbert Joe
- Another remarkable finding is that Report 1 is explicit in stating that it "contains 116 video clips" (Report, p.1), but also states in another paragraph on page 2 of the same report that the (same) DVD has all of the video recordings, along with the retrieved files on that DVD. words, the DVD either has 116 video clips in it, or 341 video clips (the sum of all the clips and retrieved files from both memory card), bu both, as the report states. Such inconsistency is very substantial." Herbert Joe
- "Arguably the most remarkable "opinion" from the Examiner in Report 2 is that from an "image of person" having an unqualified "resembl another can lead to the conclusion that that person and a particular another person "are of the same person." From "resemblance" to a identification based on the information in Report 2 is forensically, scientifically and even logically untenable." Herbert Joe
- The only "forensic" conclusion about the "spy camera" was that it was in "working condition." Herbert Joe
- "The report has no actual scientific data on it whatsoever. It is an inventory sheet of what was received and a person's best guess that tt and person on the video matched." Bryan Neumeister
- "No forensic tests were performed according to the report. It was the person's estimation the person on the screen was the client and th recording was an original." Bryan Neumeister
